SMART AND STRONG CHALE LIFELONG

i-verter
pro

i²-verter
pro

WITH AI CHARGING

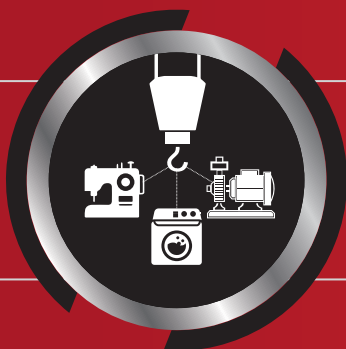

Artificial Intelligent Charging Technology

- Uses the most ideal charging method to charge the battery by reading its status and current conditions
- Technology helps to enhance the battery life.

Dual Sensor Thermal Protector

- Industry's first Dual sensor protector, provides protection for PCBA and transformer both.
- Feature ensures the longer life of inverters.

Higher Load Carrying Capacity

- Inverters provide a wide margin of safety against extra load.
- Feature makes inverter more reliable, ensures longer life of inverter.

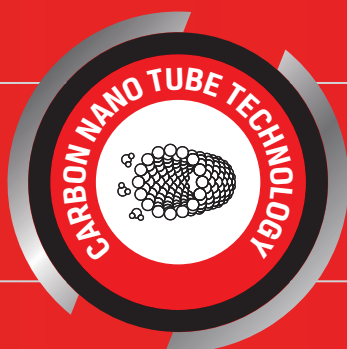

Battery Gravity Builder

- Maintains better battery gravity for higher backup.
- Ideal for areas with long power cuts

SMART AND STRONG CHALE LIFELONG

INVERTUFF BATTERY
WITH SUPERTUFF 3D GRID

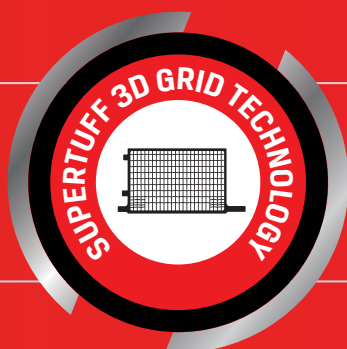

Carbon nano tube Technology

- Nano tubular carbon particles makes better particle to particle connections
- Ensures low electrical resistance leading to better charge efficiency
- Ultra high power & ultimate battery life

Active Carbon Technology

- Spherical shaped carbon particles leading to better electrical conductivity than normal irregular shaped carbon
- Higher power backup & higher battery life

SuperTUFF 3D Grid Technology

- Industry's first 3D design with a double side pasting allowing faster charging of battery
- Higher battery life owing to better adhesion of active mass

TUFF Futuristic Design

- Advanced premium design
- Robust high quality durable material
- Premium & high quality Non-woven gauntlets with fine pores that promotes extra life & enhanced backup
